Bordeaux Yachts & Hall Spars **Partners in performance**

Bordeaux Yachts has just confirmed a new partnership with HALL SPARS, a world reference for carbonfibre spars manufacturing.

Photos : Claris

New for 2010: following a **study conducted by Hall Spars for Bordeaux Yachts**, the famous spars manufacturer has developed a **carbonfibre mast** and a **Carbon VBoom** for the Bordeaux 60.

With this partnership, Bordeaux Yachts again chooses **quality, high technology** and **innovation**, so as to provide even better **performance** for their sailing boats.

Hall Spars has been specializing in carbon spars since 1992 : **weight optimisation, maximum compacting of materials, optimal solidity, aesthetics, aerodynamics** and **performance** are values shared by both brands.

The Bordeaux 60 is now available with optional **Carbon VBoom** and **carbon mast**. The mast will be **extended by 1.50m**, in order to offer a really **high performance rig**.
