2010: a year under the signs of innovation and customization for the Bordeaux 60

After Nautic 2009 in Paris that brought another order, 2010 definitely seems to be the year of innovation and customization for the Bordeaux 60:

- **A rich 2010 version:** Among other now standard features, all deck hatches are flush mounted, enhancing even more the «superyacht» looks of the Bordeaux 60 decks.
- As an answer to a client's request, **new alternatives concerning the interior woodwork, the upholstery and various materials** have been studied in association with the Couëdel - Hugon Interior Design office.
- CNB also has developed a **hydraulically operated telescopic keel system** that does not alter the interior accommodations and allows to reduce the Bordeaux 60's draft to 2,10 m.
- A **performance rig** is being developed for another customer : 1, 50 m extended carbonfibre mast , carbonfibre «Park Avenue» boom, PBO standing rigging, carbonfibre sails...

Photo: Nicolas Claris 2009 - B60 # 18

- Last but not least, a **bathtub with jacuzzi** in the forward bathroom for a Japanese client, whose Bordeaux 60 (hull# 18) is currently being sailed to Le Havre to be then shipped to the Empire of the Rising Sun! ([see picture](#)).

Bordeaux Yachts always give heed to customers' requests and have the outstanding CNB know how available to satisfy their needs.

The Bordeaux 60 team will be happy to answer all your questions at Boot Düsseldorf, from January 23 to 31, 2010 (stand 16C42)
